In our initial discussion with Colonel [Redacted] he indicated that the deposit of a vital materials copy of all cables would have to have the approval of the Director, and he suggested that action to obtain this approval be initiated by Management Staff. I believe the attached memo is merely to confirm this statement which he omitted in his original comments. We have kept this problem in mind and it was our intention to make this our first action in implementing the recommendations if and when approved by Communications and the Cable Secretary. (In view of the dispute as to the ownership of the vital materials copy that arose since the submission of the staff study, it may be that [Redacted] will attempt to force the issue of ownership in obtaining the Director's approval.)
